PERSONAL PROJECTS

Inventory Management & POS System

- The **Inventory Management and POS System** is a comprehensive software solution designed to streamline inventory tracking and sales operations for businesses. Built with **Angular** for the frontend, **.NET Core Web APIs** for the backend, and **SQL Server** for the database, this system provides a seamless and efficient platform for managing inventory, processing sales, and generating reports.

Qurbani Management (05/2021 - 12/2022)

- The **Qurbani Management System** is a web-based application designed to streamline and automate the process of managing Qurbani (sacrificial animal) orders, distributions, and records during the Eid al-Adha season. Built with **Angular** for the frontend, **.NET Core** for the backend, and **SQL Server** for the database.

Static Website

- A **Static Website** is a collection of web pages built using **HTML**, **CSS**, and **JavaScript** that deliver fixed content to users. Unlike dynamic websites, static websites do not rely on server-side processing or databases. They are fast, secure, and easy to deploy, making them ideal for portfolios, blogs, business landing pages, and informational sites.

WORK EXPERIENCE

Full Stack Developer Bace Systems
